Objectives: To provide participants with a strong foundation in Machine Learning and Deep Learning algorithms.

Summary Report

The programme titled "*ML & DL Algorithms for Real Time AI Tools: From Foundation to Application*" was conducted to provide participants with a comprehensive understanding of Machine Learning and Deep Learning concepts and their practical implementation in real-time AI applications. This programme enhanced students' technical competence, practical awareness, and readiness for emerging AI-driven careers, effectively bridging the gap between academic foundations and real-world applications. The programme titled "*Beyond Degree: Designing a Future-Ready Career*" was organized to guide students in preparing for professional success beyond academic qualifications. This session emphasized the importance of career planning, skill development, and adaptability in a rapidly evolving job market. Participants were informed about current industry trends, required skill sets, and qualification pathways needed to succeed in the IT field.

Outcome of the Program

1. Participants gained a strong understanding of Machine Learning and Deep Learning algorithms and their application in real-time AI tools and industry use cases.
2. Students developed awareness of current and emerging technologies in AI and IT, enabling them to relate theoretical concepts to practical implementations.
3. Participants acquired clarity on future-ready career planning, recognizing the importance of skills, certifications, and continuous learning beyond academic degrees.
4. Students became informed about diverse career opportunities in the IT sector and the competencies required for various professional roles.
5. The programme enhanced employability, technical confidence, and professional **readiness** among participants.
6. Students were motivated to pursue advanced learning, innovation, internships, and industry-relevant skill development to meet evolving workforce demands.
