Summary Report

Day-1: Integrating AI Tools in Academic Research Workflow using (Consensus and Overleaf)

The first session focused on the integrating AI tools like Consensus and Overleaf transforms the research workflow from manual, time – consuming processes to an evidence-based ,streamlined approach. Dr.S Manju Priya explained practically working with Consensus and using scientific, peer reviewed data to answer research questions. The session provided a strong foundation for the tools and advanced concepts covered in the upcoming days.

Day 2 – Elicit, Jilier, Scispace in AI Tools

The second session covered three prominent AI- powered research assistants- Elicit,Scispace and conceptual overview of AI –driven synthesis techniques.Dr E Revathi has explained these tools are designed to accelerate literature reviews, data extraction and evidence synthesis in academic and professional research. Participants gained hands-on exposure to analyzing live research tools and difference between the Elicit and Scispace.

Day 3 – Notebook LM (AI research tool and thinking partner)

The third day focused on AI – powered research and note – taking tool, it is designed to act as a thinking partner. Dr. D. Sumathi explained practically how the users upload their own sources, such as PDFs, Google docs, websites and YouTube videos. Users can interact with these sources using Gemini AI model. NotebookLM bases provided the knowledge on the documents. The session helped participants to learn about the Notebook.

Day 4 – Teaching with Depth and Practice (Claude)

The fourth session focused on highlights the transition from surface –level lecturing to deep, engaging and skill based learning. Dr N Priya has given knowledge on student centered approach that emphasize deep understanding and practical application aligning with modern educational goals like NEP 2020 . The resource person also highlighted best practices in Deep Teaching, Teaching as Practice, active learning Integration and technology – enabled learning.

Day 5 – Sora AI Video Generator

The final day focused in Open AI’s Sora is a state-of- the –art generative AI model that creates and imaginative video scenes up to 60 seconds long from text prompts, images or existing video footage. Dr. A. Vijayalakshmi explained about how to generate video with the help of Sora AI Video Generator. Participants also performed hands-on tasks related to real-time cyber security case studies, vulnerability mitigation techniques, and securing cloud-based applications. The session concluded with discussions on future trends in cyber security and career opportunities for faculty and students.

Outcome of the Programme

1. Fundamental concepts of Artificial Intelligence Tools and its role in modern teaching – learning processes.
2. Effectively use AI–powered educational tools for lesson planning, content creation, and assessment and student engagement.
3. Develop learner-centered pedagogical strategies using AI tools to support personalized and adaptive learning.
4. Apply AI tools technologies to facilitate interactive, collaborative and experimental learning environments.
5. Align AI tools –enabled teaching methods with course outcomes, program outcomes and accreditation requirements.
