

Marudhar Kesari Jain College for Women (Autonomous)

Vaniyambadi – 635 751

PG & Research Department of Foods and Nutrition

For

Undergraduate Programme

Bachelor of Science in Nutrition Food Service Management & Dietetics

Regulations 2024 - 2025

LEARNING OUTCOMES BASED CURRICULUM FRAME WORK FOR UNDERGRADUATE AND POSTGRADUATE EDUCATION

1. Preamble

Nutrition plays a major role in fostering optimal health and well-being of an individual, and provides an absolute understanding of the intricate interplay between food, nourishment and human physiology. The Department of Nutrition, FSM & Dietetics of Marudhar Kesari Jain College for Women, Vaniyambadi strives to produce young budding nutritionists and dietitians who through rigorous research, education and outreach empower individuals to make informed choices about their diet and lifestyles, promoting longevity, vitality and resilience.

Nutrition is not only a cornerstone of preventive healthcare but also a catalyst for social change and sustainable development. We, the Department of Nutrition, Food Service Management & Dietetics engage with communities, policymakers and industry partners to address predominant nutritional challenges, foster food security and promote environmental stewardship.

The programme is aimed at training undergraduate graduate students who would have adequate background knowledge and practical skills for application in postgraduate research, teaching, industrial production, medical, hospital and environmental management

The Department aims to equip the undergraduate students with a sound knowledge of the fundamental principles involved in the study of Nutrition, FSM and Dietetics, to produce graduates who would create an impact in the diverse fields of human endeavors, considering the ubiquitous nature of food and the wide – ranging applications of the knowledge of Nutrition.

The main objective of the Department is to provide focus for a career in various fields of applied science including Food Industries, Medical Coding, Research Institution, Hospital Administration, Food Service Sectors, Free Lancing, Health Sectors, Quality Control, Biotechnology, Government and Non-Government agencies.

**LEARNING OUTCOMES BASED CURRICULUM FRAMEWORK FOR
UNDER GRADUATE EDUCATION**

| | |
|---------------------------|--|
| Programme | B.Sc., Nutrition Food Service Management & Dietetics |
| Programme Code | US07 |
| Duration | 3years [UG] |
| Programme Outcomes | <p>PO1: Disciplinary Knowledge: Demonstrate comprehensive knowledge and understanding of one or more disciplines that form part of an undergraduate programme of study.</p> <p>PO2: Communication Skills: Express thoughts and ideas effectively in both written and oral forms; communicate using appropriate media; confidently present views; listen attentively; read and write analytically; and present complex information clearly and concisely to different groups.</p> <p>PO3: Critical thinking: Capability to apply analytic thought to a body of knowledge; analyze and evaluate evidence, arguments, claims, beliefs on the basis of empirical evidence; identify relevant assumptions or implications; formulate coherent arguments; critically evaluate practices, policies and theories by following scientific approach to knowledge development.</p> <p>PO4: Problem solving: Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non-familiar problems, rather than replicate curriculum content knowledge; and apply one's learning to real life situations.</p> <p>PO5: Analytical reasoning: Ability to evaluate there liability and relevance of evidence ;identify logical flaws and holes in the arguments of others; analyze and synthesize data from a variety of sources; draw valid conclusions and support them with evidence and examples and addressing opposing viewpoints.</p> <p>PO6: Research-related skills: A sense of inquiry and capability for asking relevant/appropriate questions, problem arising, synthesizing and articulating; Ability to recognize cause-and-effect relationships, define problems, formulate hypotheses, test hypotheses, analyse, interpret and draw conclusions from data, establish hypotheses, predict cause-and-effect relationships; ability to plan, execute and report the result so fan experiment or investigation.</p> <p>PO7: Cooperation / Teamwork: Ability to work effectively and respect</p> |

| | |
|--|--|
| | <p>fully with diverse teams; facilitate cooperative or coordinate effort on the part of a group, and act together as a group or a team in the interests of a common cause and work efficiently as a member of a team.</p> <p>PO8:Scientific reasoning :Ability to analyse, interpret and raw conclusions from quantitative/qualitative data; and critically evaluate ideas, evidence, and experiences from an open-minded and reasoned perspective.</p> |
|--|--|

PROGRAM OUTCOMES

| | |
|------------|---|
| PO1 | Acquire knowledge in Nutrition and Dietetics and trade to apply the knowledge in their day- to- day life for betterment of self and society. |
| PO2 | Develop critical, analytical thinking and problem-solving skills. |
| PO3 | Develop research related skills in defining the problem, formulate and test the hypothesis, analyze ,interpret, and draw conclusion from data. |
| PO4 | Address and develop solutions for societal and environmental needs of local, regional and national development. |
| PO5 | Work independently and engage in lifelong learning and enduring proficient progress. |
| PO6 | Provoke employability and entrepreneurship among students along with ethics and communication skills. |
| PO7 | Understand the importance of ethical behavior in business contexts and be able to recognize and address ethical counter in their professional careers. |
| PO8 | Prepared for lifelong learning and professional development, including the ability to adapt to changes in technology, business practices, and economic conditions throughout their careers. |

PROGRAM SPECIFIC OUTCOMES

| | |
|-------------|---|
| PSO1 | This program provides comprehensive knowledge and nutritional practical skills in the area of Food Microbiology, Food Science, Menu Planning, Human Physiology and Nutritional Biochemistry |
| PSO2 | Students will be able to show case their expertise on food standards and quality control, Formulation of novel food products and sensory evaluation. |
| PSO3 | Students will be able to demonstrate their practical skills by analyzing disease condition and prescribed diet for necessary conditions. |

Eligibility for Admission:

Candidate for admission to the first year of (B.Sc., Nutrition, Food Service Management & Dietetics) Department of Foods & Nutrition shall be required to have passed the Higher Secondary Examination with Biology, Chemistry, Pure Science and Home Science as major subjects of any other Board accepted as equivalent there to by Thiruvalluvar University

Methods of Evaluation and Assessment

| Methods of evaluation | | |
|--------------------------------|---|------------------|
| Internal Evaluation | | 25Marks |
| External Evaluation | End Semester Examination | 75Marks |
| Total | | 100 Marks |
| Methods of Assessment | | |
| Recall(K1) | Simple definitions, MCQ, Recall steps, Concept definitions | |
| Understand/ Comprehend (K2) | MCQ, True/False, Short essays, Concept explanations, short summary or overview | |
| Application(K3) | Suggest idea/concept with examples, suggest formulae, solve problems, Observe, Explain | |
| Analyze(K4) | Problem-solving questions, finish a procedure in many steps, Differentiate Between various ideas, Map knowledge | |
| Evaluate(K5) | Longer essay/Evaluation essay, Critique or justify with pros and cons | |
| Create(K6) | Check knowledge in specific or of beat situations, Discussion, Debating or Presentations | |

1ST YEAR: FIRST SEMESTER

| Course Code | Course Name | Category | L | T | P | S | Credits | Hours | Marks | | |
|----------------------------|---|----------|---|---|---|---|---------|-------|-------|-----------|-------|
| | | | | | | | | | CIA | External | Total |
| 24UNDC11 | CC -1 BASICS IN FOOD MICROBIOLOGY | Core | 3 | 1 | 2 | 0 | 5 | 6 | 25 | 75 | 100 |
| Learning Objectives | | | | | | | | | | | |
| LO1 | Understand the interaction between micro-organisms and food. | | | | | | | | | | |
| LO2 | Discuss the factors that favor or inhibit the growth of microbes. | | | | | | | | | | |
| LO3 | Understand the role of microbes in fermentation, spoilage and foodborne diseases. | | | | | | | | | | |
| LO4 | Describe the microorganisms found in food, including bacteria, fungi, viruses, and Parasites | | | | | | | | | | |
| LO5 | Recognize the signs of food spoilage caused by microbial activity and understand the mechanisms involved. | | | | | | | | | | |
| Unit | Content | | | | | | | | | Hours | |
| 1 | History and Development Of Food Microbiology History and Development of Food Microbiology. Definition and Scope of food microbiology. Inter-relationship of microbiology with other sciences. Characteristics of Microorganisms in Food. - Types of micro-organisms (Bacteria, Molds, and Yeast) associated with food their morphology and structure. | | | | | | | | | 18 | |
| 2 | Microbial Growth In Food Bacterial growth curve and microbial growth in food. Factors affecting the growth of microorganisms in food. Methods for the Destruction of bacteria. Cultivation of Micro- organisms. | | | | | | | | | 18 | |
| 3 | Microbial Food Spoilage Spoilage of specific food groups-Milk and dairy products, Meat, poultry and sea foods, Cereal and cereal products, Pulses and pulses products, Fruits and vegetables and Canned products. | | | | | | | | | 18 | |
| 4 | Food Fermentation Fermentation- Definition and Benefits of fermentation and types of Microorganisms used in food fermentations. Dairy Fermentations -starter cultures and their types, concept of probiotics, Fermented Foods - types, methods of manufacture of vinegar, sauerkraut, tempeh, miso, soya sauce, beer, wine. | | | | | | | | | 18 | |
| 5 | Food Borne Illness Types–food borne infections (Salmonellosis, Shigellosis, Vibriopara haemoliticus, Enteropathogenic Escherichia coli, Hepatitis A) Foodborne bacterial intoxications (Staphylococcal, Bacillus cereus, Botulism). Trends in Food Microbiology - Rapid methods for detection of microorganisms in food. | | | | | | | | | 18 | |

| CO | Course Outcomes |
|-----|--|
| CO1 | To understand the structure and functions of microbes (Bacteria, Molds, Yeast) |
| CO2 | To Gain knowledge on Microbial Growth, Destruction of Bacteria |
| CO3 | To gain knowledge on the microbes related to food spoilage |
| CO4 | To study the importance of fermented foods and methods of manufacture |
| CO5 | To gain Knowledge on food Borne illness |

1ST YEAR: FIRST SEMESTER

| Course Code | Course Name | Category | L | T | P | S | Credits | Hours | Marks | | |
|---------------------|---|----------|---|---|---|---|---------|-------|-------|----------|-------|
| | | | | | | | | | CIA | External | Total |
| 24UCHA11 | Allied / Generic – 1 ALLIED CHEMISTRY | Core | 3 | 1 | 0 | 0 | 3 | 4 | 25 | 75 | 100 |
| Learning Objectives | | | | | | | | | | | |
| LO1 | To understand Chemical Bonding and Nuclear Chemistry. | | | | | | | | | | |
| LO2 | To understand the Nuclear Chemistry. | | | | | | | | | | |
| LO3 | To understand types of reactions. | | | | | | | | | | |
| LO4 | To correlate types of thermodynamics process. | | | | | | | | | | |
| LO5 | To understand separation and purification techniques. | | | | | | | | | | |
| Unit | Content | | | | | | | | | | Hours |
| 1 | Chemical Bonding and Nuclear Chemistry: Chemical Bonding: Molecular Orbital Theory-bonding, anti-bonding and non-bonding orbitals. Molecular orbital diagrams for Hydrogen, Helium, Nitrogen; discussion of bond order and magnetic properties. Nuclear Chemistry: Fundamental particles - Isotopes, Isobars, Isotones and Isomers. | | | | | | | | | | 9 |
| 2 | Industrial Chemistry: Fuels: Fuel gases: Natural gas, water gas, semi water gas, carbureted water gas, producer gas, CNG, LPG and oil gas (manufacturing details not required). Silicones: Synthesis, properties and uses of silicones. Fertilizers: Urea, NPK fertilizer, superphosphate, triple superphosphate. | | | | | | | | | | 9 |
| 3 | Fundamental Concepts in Organic Chemistry: Hybridization: Orbital overlap, hybridization and geometry of CH ₄ , C ₂ H ₄ and C ₆ H ₆ . Electronic effects: Inductive effect, electromeric effect, mesomeric effect, hyper conjugation and steric effects - examples. Reaction mechanisms: Types of reactions – aromaticity (Huckel's rule) – aromatic electrophilic substitution: nitration, halogenation, Friedel-Craft's alkylation and acylation. | | | | | | | | | | 9 |
| 4 | Thermodynamics and Phase Equilibria: Thermodynamics: Types of systems, reversible and irreversible processes, Statements of first law and second law of thermodynamics. Carnot's cycle and efficiency of heat engine. Entropy and its significance. Relationship between Gibbs free energy and entropy. | | | | | | | | | | 9 |
| 5 | Analytical Chemistry: Principles of volumetric analysis. Separation and purification techniques – extraction, distillation and crystallization. Chromatography: principle and application of column, paper and thin layer chromatography. | | | | | | | | | | 9 |

| CO | Course Outcomes |
|-----|---|
| CO1 | Gain in-depth knowledge about the theories of chemical bonding, nuclear reactions and its applications. |
| CO2 | Evaluate the efficiencies and uses of various fuels and fertilizers. |
| CO3 | Explain the type of hybridization, electronic effect and mechanism involved in the organic reactions. |
| CO4 | Apply various thermodynamic principles, systems and phase rule. |
| CO5 | Explain various methods to identify an appropriate method for the separation of chemical components. |

1ST YEAR: FIRST SEMESTER

| Course Code | Course Name | Category | L | T | P | S | Credits | Hours | Marks | | |
|---------------------|--|----------|---|---|---|---|---------|-------|-------|----------|-------|
| | | | | | | | | | CIA | External | Total |
| 24UCHS12P | ALLIED CHEMISTRY PRACTICAL | Core | 0 | 0 | 2 | 0 | 2 | 2 | 25 | 75 | 100 |
| Learning Objectives | | | | | | | | | | | |
| LO1 | Different types of organic compounds with respect to their properties. | | | | | | | | | | |
| LO2 | Determination of elements in organic compounds. | | | | | | | | | | |
| LO3 | Identification of organic functional groups. | | | | | | | | | | |
| LO4 | Identify the components and structure of an unknown organic molecule | | | | | | | | | | |
| LO5 | Skills to solve problems related to the identification of organic molecules through a series of tests and observations. | | | | | | | | | | |
| Unit | Content | | | | | | | | | Hours | |
| 1 | Systematic Analysis of Organic Compounds The analysis must be carried out as follows: (a) Preliminary Tests To distinguish between aliphatic and aromatic compounds. | | | | | | | | | 6 | |
| 2 | To distinguish – Saturated and unsaturated compounds. | | | | | | | | | 6 | |
| 3 | Detection of special elements (N, S, Halogens). | | | | | | | | | 6 | |
| 4 | Identification of Functional group tests (Absence of special elements) Phenol, Acids (mono & di), Aldehyde and Glucose. | | | | | | | | | 6 | |
| 5 | Identification of Functional group tests (Presence of special elements) Presence aromatic primary amine, Amides (mono & di). | | | | | | | | | 6 | |

| CO | Course Outcomes |
|-----|--|
| CO1 | Gain an understanding of the use of standard flask and volumetric pipettes, burette. |
| CO2 | Design, carry out, record and interpret the results of volumetric titration. |
| CO3 | Apply their skill in the analysis of water/hardness. |
| CO4 | Analyze the chemical constituents in allied chemical products. |
| CO5 | Describe the measurable skills, abilities, knowledge in qualitative analysis. |

| 24UNDS11 | SEC 1 NM WOMEN'S HEALTH AND WELLNESS | Core | 1 | 0 | 1 | 0 | 2 | 2 | 25 | 75 | 100 |
| Learning Objectives | | | | | | | | | | | |
| LO1 | Understand the Diverse Factors that has a Bearing on Women's Health | | | | | | | | | | |
| LO2 | Highlight the Factors that Contribute to a Healthy Lifestyle among Women Across the Globe | | | | | | | | | | |
| LO3 | Describe the anatomy and Physiology of the Female Reproductive System | | | | | | | | | | |
| LO4 | Recognize the unique Mental Health Challenges Faced by Women | | | | | | | | | | |
| LO5 | Develop Nutrition and Fitness Plans to Women's Health Needs | | | | | | | | | | |
| Unit | Content | | | | | | | | | Hours | |
| 1 | NUTRITION FOR WOMEN Dietary Guidelines for a healthy lifestyle, Nutrient requirements for adolescents' girls and adult women with special focus on Protein, Iron, Vitamin C, and Calcium, Factors affecting nutrient intake in women. | | | | | | | | | 6 | |
| 2 | PHYSICAL HEALTH Significance of body weight and body composition parameters, Benefits of aerobic, exercises on general health, bone health. Yoga and Fitness -benefits | | | | | | | | | 6 | |
| 3 | REPRODUCTIVE HEALTH Menstrual Health-safe and hygienic practices to be followed, Pre- and Post- Menopausal concerns- preventive measures, sexually transmitted diseases-an overview | | | | | | | | | 6 | |
| 4 | STRESS MANAGEMENT Common mental health problems - Depression, Anxiety, Stress. Strategies to improve mental health. | | | | | | | | | 6 | |
| 5 | SOCIAL HEALTH Balancing home and career, strengthening relationships, enhancing communication skills and leadership skills. | | | | | | | | | 6 | |

| CO | Course Outcomes |
|-----|--|
| CO1 | Define terms related to nutrition, physical, reproductive, mental and social health |
| CO2 | Discuss the need of Right Nutrition , Exercise and Skills needed for the overall well being of women |
| CO3 | Explaining the Significance of Maintaining Physical , Reproductive ,Mental and social for overall well being of an women |
| CO4 | Devise Strategies to Improve Women’s Health in a Holistic Manner |
| CO5 | Recommends Pleasure for a Healthy Life style |

| 24UNDF11 | FC – FOUNDATION COURSE IN HOME SCIENCE | Core | 1 | 1 | 0 | 0 | 2 | 2 | 25 | 75 | 100 |
| Learning Objectives | | | | | | | | | | | |
| LO1 | Understand the basics in Nutrition, Food Service Management & Dietetics | | | | | | | | | | |
| LO2 | Gain awareness on the care opportunities in home science. | | | | | | | | | | |
| LO3 | Understand the scope, significance, and multi-disciplinary nature of home science | | | | | | | | | | |
| LO4 | Acquire skills in home management, organization, budgeting, time management | | | | | | | | | | |
| LO5 | Develop critical thinking skills to analyze situations related to home science | | | | | | | | | | |
| Unit | Content | | | | | | | | | Hours | |
| 1 | Introduction To Food Science Definition, Food groups and their Nutritive aspects of food constituents. Functions of food physiological, psychological and social. Relationship between food, nutrition and health. | | | | | | | | | 6 | |
| 2 | Introduction to Nutrition And Dietetics A. Definition of Nutrition, Basic function of Carbohydrates, Lipids, Proteins, Vitamins and Minerals. B. Definition of balanced diet, Importance of menu planning. Difference between normal and therapeutic diets C. Role of diet and life style changes in health promotion and disease prevention | | | | | | | | | 6 | |
| 3 | Introduction Of Food Service Management A. Definition of Food Service Management; types of food service establishments- commercial and non-commercial B. Food service-Types C. Introduction to concepts of management, functions of manager in managing sources like manpower, materials, money, time, machinery and methods. | | | | | | | | | 6 | |
| 4 | Introduction to Electives Under Home Science A. Human Development Stages of Human Life span B. Interior Decoration – Introduction and concept of interior design, C. Textile and Clothing – Yarn, cotton, Jute, Silk, Manmade Fibers | | | | | | | | | 6 | |
| 5 | Career Opportunities In Home Science- Nutrition, Food Service Management And Dietetics A. Seeding importance of higher studies and its role in enhancing job opportunities B. Exposure to Job opportunities-Role and Responsibilities of Nutritionist and Dietitian and Community Nutritionist, CDPO, Food Safety Officer Registered Dietitian, Lactation Consultant and Manager of Food/Hospitality Service. C. Extension Education | | | | | | | | | 6 | |

| CO | Course Outcomes |
|-----------|---|
| CO1 | Describe basic concepts in Food Science, Nutrition, Dietetics and Food Service Management |
| CO2 | Identify the relationship between food, nutrition, diet and health |
| CO3 | Explain the concept of Food Services and Food Service Management |
| CO4 | Analyze the importance of the study of Food Service Management, Human Development, Interior Decoration and Textiles |
| CO5 | Summarize the career opportunities available in-Home Science, Nutrition, Dietetics and Food Service Management |

1ST YEAR: SECOND SEMESTER

| Subject Code | Course Name | Category | L | T | P | S | Credits | Hours | Marks | | |
|----------------------------|---|-------------|----------|----------|----------|----------|----------|----------|-------|--------------|-------|
| | | | | | | | | | CIA | External | Total |
| 24UNDC21 | Core Course 2- HUMAN PHYSIOLOGY | Core | 3 | 1 | 2 | 0 | 5 | 6 | 25 | 75 | 100 |
| Learning Objectives | | | | | | | | | | | |
| LO1 | To enable the students to know about the cells and tissues | | | | | | | | | | |
| LO2 | To gain basic understanding of human anatomy and physiology | | | | | | | | | | |
| LO3 | To discuss the fundamental relationship between anatomy and physiology | | | | | | | | | | |
| LO4 | Use familiarity with the human body and its functioning to make healthful choices with regard to nutrition and take appropriate action when signs of illness arise | | | | | | | | | | |
| LO5 | To Understand about the hormones and its functions. | | | | | | | | | | |
| Unit | Content | | | | | | | | | Hours | |
| 1 | Cells and tissues- Structure and function of cell and its organelles. Cell Division and Classification. Structure, Types and functions of tissues. Blood- Constituents of blood- RBC, WBC and Platelets and its functions, Blood groups Immune system- Types of Immunity, Role of Antigen and Antibody. | | | | | | | | | 14 | |
| 2 | Nervous system Structure and functions of brain (cerebrum, brainstem, cerebellum), Structure and Functions of Spinal cord; Functions of Autonomic Nerves and Cranial nerves Structure and functions of external organs (Eyes, Ears, Skin, Taste and Smell) | | | | | | | | | 14 | |
| 3 | Heart and circulation Anatomy of the heart and blood vessels, origin and conduction of heart beat, cardiac cycle, Blood Pressure Definition and factors affecting blood pressure. Respiratory system Anatomy and physiology of respiratory organs. Mechanism of respiration, Gaseous exchange in the lungs and tissues.(Inhalation and Exhalation) | | | | | | | | | 14 | |
| 4 | Digestive system Anatomy of Gastro-intestinal tract, Digestion and absorption of carbohydrates, proteins and fats. Excretory system- Structure of kidney, structure of nephron, physiology of urine Formation. | | | | | | | | | 14 | |
| 5 | Endocrine system Hormones secreted by Pituitary gland, thyroid, parathyroid and adrenal glands and its functions, Menstrual cycle. Sex hormones –Role of hormones in pregnancy and Lactation. | | | | | | | | | 14 | |

| CO | Course Outcomes |
|-----|---|
| CO1 | Recall the structure and functions of the cell, its organelles and the various tissues |
| CO2 | Describe the structure and functions of the various organs and systems in the body |
| CO3 | Identify the microscopic structure of basic tissues, label the parts of primary physiological systems in the body such as nervous, respiratory, digestive, endocrine and reproductive systems |
| CO4 | Evaluate the role of the nervous and endocrine system in regulating the activities of other systems. |
| CO5 | Perform haematological study on blood such as blood smear, blood count and blood grouping, record pulse, blood pressure and interpretation normal ECG |

1ST YEAR: SECOND SEMESTER

| Course Code | Course Name | Category | L | T | P | S | Credits | Hours | Marks | | |
|----------------------------|---|-------------|----------|----------|----------|----------|----------|----------|-----------|--------------|------------|
| | | | | | | | | | CIA | External | Total |
| 24UCHA21 | Elective Course 2 Allied Chemistry - II | Core | 3 | 1 | 0 | 0 | 4 | 6 | 25 | 75 | 100 |
| Learning Objectives | | | | | | | | | | | |
| LO1 | To understand the mechanisms of polymerisation and their impact on polymer properties. | | | | | | | | | | |
| LO2 | To analyze real-world problems and apply the fundamental principles of photochemical reactions to identify potential solutions. | | | | | | | | | | |
| LO3 | To apply the concepts of electrochemistry to analyze the behavior of batteries and fuel cells. | | | | | | | | | | |
| LO4 | To encompass the core concepts of corrosion delves into the application of protective coatings, such as paints, enamels, and lacquers, to safeguard materials from corrosion. | | | | | | | | | | |
| LO5 | To assess various pharmaceutical drugs, including sulfa drugs, antibiotics, anesthetics, antiseptics, analgesics, antipyretics, tranquilizers, and sedatives. | | | | | | | | | | |
| Unit | Content | | | | | | | | | Hours | |
| 1 | Polymer Chemistry - Introduction, classification of polymers, types of polymerisation, addition polymerization - mechanism of free radical polymerization, condensation and copolymerization. Thermoplastic and thermosetting polymers, difference between thermoplastic and thermosetting polymers, preparation, properties and uses of Polythene, PVC, Teflon, Nylon 6,6 and Polyesters | | | | | | | | | 12 | |
| 2 | Photochemistry - Grothus-Draper's law and Stark-Einstein's law of photochemical equivalence, Quantum yield - Hydrogen-chloride reaction. Jablonskii diagram - Phosphorescence, fluorescence, chemiluminescence and photosensitization and photosynthesis (definition with examples).. | | | | | | | | | 12 | |
| 3 | Electrochemistry - Electrolytes – Definition and Examples – Classification - Specific and Equivalent Conductance – Ostwald's Dilution Law and its Limitations. Batteries - primary and secondary batteries - difference between primary and secondary batteries. Lead storage battery - cell diagram, cell reaction and uses. Fuel cell H ₂ -O ₂ fuel cell - explanation with diagram. | | | | | | | | | 12 | |
| 4 | Corrosion and Protective Coatings - Corrosion - types, corrosion control methods. Electrochemical corrosion and its prevention - Electroplating and Electroless plating - applications. Paints - Components of Paint – Requisites of a Good Paint - Pigments Classification of Pigments based on Colour. Dyes – Definition – Classification based on Constitution and Application – Chromophores and Auxochromes. Enamels and Lacquers - composition and uses. | | | | | | | | | 12 | |

| | | |
|---|--|----|
| 5 | Pharmaceutical Chemistry - Sulpha Drugs – Preparation and uses of Sulphapyridine and Sulphadiazine - mode of action of Sulpha drugs - Antibiotics - Uses of Penicillin, Chloramphenicol and Streptomycin - Anaesthetics - General and Local Anaesthetics - Antiseptics - Analgesics, Antipyretics, Tranquilizers, Sedatives - Examples and their applications | 12 |
|---|--|----|

| CO | Course Outcomes |
|-----|---|
| CO1 | Critically evaluate the properties and applications of different types of polymers to select the most suitable materials for specific purposes. |
| CO2 | To explain the laws of photochemistry and calculate quantum yields. |
| CO3 | Construct electrochemical cells, such as batteries and fuel cells, based on theoretical principles |
| CO4 | Ability to design and implement effective corrosion prevention strategies for various materials and environments. |
| CO5 | Develop new pharmaceutical compounds with improved efficacy and reduced toxicity |

| 24UCHA21P | Elective Course 3 Chemistry Practical for Physical and Biological Sciences - II | Core | 0 | 0 | 2 | 0 | 2 | 30 | 25 | 75 | 100 |
| Learning Objectives | | | | | | | | | | | |
| LO1 | Different types of organic compounds with respect to their properties. | | | | | | | | | | |
| LO2 | Determination of elements in organic compounds. | | | | | | | | | | |
| LO3 | Identification of organic functional groups. | | | | | | | | | | |
| LO4 | Identify the components and structure of an unknown organic molecule. | | | | | | | | | | |
| LO5 | Skills to solve problems related to the identification of organic molecules through a series of tests and observations. | | | | | | | | | | |
| Unit | Content | | | | | | | | | Hours | |
| 1 | Systematic Analysis of Organic Compounds The analysis must be carried out as follows: (b) Preliminary Tests (c) To distinguish between aliphatic and aromatic compounds. | | | | | | | | | 6 | |
| 2 | To distinguish – Saturated and unsaturated compounds. | | | | | | | | | 6 | |
| 3 | Detection of special elements (N, S, Halogens). | | | | | | | | | 6 | |
| 4 | Identification of Functional group tests (Absence of special elements) Phenol, Acids (mono & di), Aldehyde and Glucose. | | | | | | | | | 6 | |
| 5 | Identification of Functional group tests (Presence of special elements) Presence aromatic primary amine, Amides (mono & di). | | | | | | | | | 6 | |

| CO | Course Outcomes |
|-------------------------|--|
| CO1 | Gain an understanding of the use of standard flask and volumetric pipettes, burette. |
| CO2 | Design, carry out, record and interpret the results of volumetric titration. |
| CO3 | Apply their skill in the analysis of water/hardness. |
| CO4 | Analyze the chemical constituents in allied chemical products. |
| CO5 | Describe the measurable skills, abilities, knowledge in qualitative analysis. |

| Learning Objectives | | | | | | | | | | | |
| LO1 | To gain self-competency and confidence | | | | | | | | | | |
| LO2 | To practice emotional competency | | | | | | | | | | |
| LO3 | To gain an edge through professional competency | | | | | | | | | | |
| LO4 | To aim for Holistic Life | | | | | | | | | | |
| LO5 | To understand the importance of human value strategies and techniques skills | | | | | | | | | | |
| Unit | Content | | | | | | | | | Hours | |
| 1 | Communication Skills Developing Listening, Speaking and Reading Skills, An introduction to Scientific Writing, Letter writing, and Usage of Non-verbal Communication | | | | | | | | | 6 | |
| 2 | Professional Skills Resume writing Interview Skills. Group Discussions, Presentation Skills. Work-Life Balance- Strategies to achieve them, Time Management. | | | | | | | | | 6 | |
| 3 | Leadership/Management Skills Leadership skills, Managerial skills, Team building, Entrepreneurial skills, Ethics and Integrity. | | | | | | | | | 6 | |
| 4 | Basic Lifestyle-related Skills Healthy eating using simple cooking practices, Home makeover skills, Basics in Gardening, Stress Management- Yoga and Fitness practices Benefits for a Holistic Life. | | | | | | | | | 6 | |
| 5 | Human Value Skills Strategies and techniques to promote Non-Violence, Service to the community, developing skills pertaining to administering First Aid | | | | | | | | | 6 | |

| CO | Course Outcome |
|-----|---|
| CO1 | Describe different skills and techniques needed to maintain a healthy personal and Professional approach to life. |
| CO2 | Identify skills needed for a healthy lifestyle. |
| CO3 | Explain the need to develop various skill sets for a holistic life. |
| CO4 | Develop confidence with respect to emotional competency, personal and Professional life. |
| CO5 | Recommend life skill strategies for the holistic development of the individual |

| | | | | | | | | | CIA | External | Total |
| 24UNDC31 | FOOD SCIENCE | Core | 3 | 1 | 2 | 0 | 5 | 6 | 25 | 75 | 100 |
| Learning Objectives | | | | | | | | | | | |
| LO1 | To enable students to obtain knowledge of different food groups and their contribution to nutrition. | | | | | | | | | | |
| LO2 | Understand the Source and Nutritional Significance of Pulses, fruits and vegetables. | | | | | | | | | | |
| LO3 | Understand the Classification and Nutritional Composition of Fleshy Foods, Eggs, and Milk Products. | | | | | | | | | | |
| LO4 | Understand the sources of dietary fats and oils and stages of sugar cookery. | | | | | | | | | | |
| LO5 | Recognize the uses of beverages, spices, condiments, food additives and food adulterants. Daily diets and culinary applications. | | | | | | | | | | |
| Unit | Content | | | | | | | | | Hours | |
| 1 | <p>NUTRIENT CONTENT OF FOODS - Classification of foods according to nutrient content. Food groups for balanced diets - Food in relation to health.</p> <p>COOKING METHODS – Objectives, preliminary preparation and Study of the different cooking methods, merits and demerits, Solar cooking and Microwave cooking.</p> <p>CEREALS AND MILLETS -Source of manufacture, structure, composition, processing of rice, wheat and millets (Maize, Jowar, Ragi). Fermented Cereal Products.</p> | | | | | | | | | 18 | |
| 2 | <p>PULSES- Classification and Nutritive value. Effect of cooking and factors affecting quality. VEGETABLES- Classification, Composition and Nutritive value, Effect of cooking on color, texture, flavor, appearance and nutritive value. Vegetable cookery-Changes during cooking.</p> <p>FRUITS –Classification, Nutritive value, Enzymatic Browning.</p> | | | | | | | | | 18 | |
| 3 | <p>FLESH FOODS- Meats - Classification, Composition and Nutritive value, Changes during cooking and Post mortem changes. Poultry-Types, Nutritive value, selection, changes during cooking</p> <p>EGGS- Structure, Composition and Nutritive value, Quality Evaluation, Egg white foams - factors affecting foam formation</p> <p>MILK AND MILK PRODUCTS- Composition and Nutritive value, types of milk, Coagulation of milk, Milk products – Fermented products and non-fermented products; Milk cookery-Effect of heat and enzymes; Milk processing- Pasteurization and Homogenization.</p> | | | | | | | | | 18 | |
| 4 | <p>NUTS AND OIL SEEDS: Types, Nutritive value, Health benefits, Uses & toxins.</p> <p>FATS AND OILS: Source, Processing and refining of fats- Hydrogenation. Emulsification, Rancidity, Smoking point.</p> <p>SUGAR COOKERY- Types of sugars available, Stages in sugar cookery, Crystallization. Artificial sweeteners.</p> | | | | | | | | | 18 | |
| 5 | <p>BEVERAGES- Sources, Classification/types, Nutritive value, Processing, Uses - Coffee, Tea and Cocoa. Carbonated and Nonalcoholic beverages</p> <p>SPICES AND CONDIMENTS-Origin and use in food preparation.</p> | | | | | | | | | 18 | |

| | | |
|--|---|--|
| | FOOD ADDITIVES: Preservation, colorants, leavening agents, shortenings and stabilizers. FOOD ADULTERATION: Types and methods of detection. | |
|--|---|--|

| CO | Course Outcomes |
|-----|---|
| CO1 | Understand the food groups, cereals and their functions, applying the principles of methods of cooking. |
| CO2 | Analyze the Effect of Cooking on Pulses, Vegetables and fruits. |
| CO3 | Assess the effect of cooking on sensory properties and nutrient composition of various animal-based foods. |
| CO4 | Knowledge of different types of nuts, oilseeds, fats, and sugars, including their nutritional and health benefits |
| CO5 | Students will be able to understand the different types of beverages, spices and condiments, food additives and food adulterants. |

| Learning Objectives | | | | | | | | | | | |
| LO1 | To enable students to obtain knowledge of different food groups and their contribution to nutrition. | | | | | | | | | | |
| LO2 | Understand the Source & Nutritional Significance of Pulses, Vegetables, and Fruits: | | | | | | | | | | |
| LO3 | Apply the principles of cookery in cooking foods to preserve its nutrient content and minimize cooking time. | | | | | | | | | | |
| LO4 | Acquire skills in preparation of foods with good palatability and preservation of nutritive value | | | | | | | | | | |
| LO5 | Identify different stages of sugar crystallization and importance smoking temperatures of different fats and oils. | | | | | | | | | | |
| Unit | Content | | | | | | | | | Hours | |
| 1 | Introduction to Basic Cooking Skills - Edible portion Introduction to different cooking methods, cooking terminology; equipment and techniques used for pre-preparation and for different cooking methods. Methods of measuring and weighing liquids and drying ingredients. | | | | | | | | | 12 | |
| 2 | Cereals Microscopic study of different starches a. Methods of combining starch and boiling water. b. Study of effects of moist heat on starch. c. Cereal starch- Gelatinization. d. Gluten formation. Pulses - Effect of hard and soft water, alkali and acid. Cooking time of grams and dhals. Different recipes from cereals, Pulses and millets | | | | | | | | | 12 | |
| 3 | Vegetables - Effect of acids, alkali, covering, steaming and pressure cooking on the different pigments and acceptability of vegetables. Fruits - Study of different methods of preventing enzymatic browning of cut fruits, pectin content of fruits. Different recipes from vegetables, fruits | | | | | | | | | 12 | |
| 4 | Milk cookery - Coagulation of milk protein, Paneer, cooking of vegetables in milk. Different recipes from milk and milk products. Beverages - preparation of stimulating, nourishing and refreshing beverages. | | | | | | | | | 12 | |
| 5. | Fats and oils - comparison of smoking temperature of some fats and oils. Preparation of shallow and deep-fried foods. Sugar and Jaggery - Different stages of crystallization of sugar. Preparing recipes for different stages of sugar cookery. Visit to food Industry and Factories. | | | | | | | | | 12 | |

| CO | Course Outcomes |
|-----|---|
| CO1 | Gain knowledge on various food groups, role of food items in Indian cookery. |
| CO2 | Acquire knowledge on the various components of pulses, vegetables and fruits |
| CO3 | Learn the different aspects of meat, milk and their products |
| CO4 | Understand the changes taking place in nutrients while cooking the fleshy food. |
| CO5 | Knowledge on classification and nutritive value of nuts, fats and sugars |

| Subject Code | Course Name | Category | L | T | P | S | Credits | Hours | Marks | | |
|----------------------------|--|-------------|----------|----------|----------|----------|----------|----------|-------|--------------|-------|
| | | | | | | | | | CIA | External | Total |
| 24UNDA31 | Elective-AL METABOLISM OF NUTRIENTS | Core | 2 | 1 | 1 | 0 | 4 | 4 | 25 | 75 | 100 |
| Learning Objectives | | | | | | | | | | | |
| LO1 | To gain knowledge about enzymes and metabolism of Carbohydrates | | | | | | | | | | |
| LO2 | Understand the concept of Proteins and their biological activity | | | | | | | | | | |
| LO3 | Analyze the lipid metabolism and cholesterol biosynthesis | | | | | | | | | | |
| LO4 | To know the significance of recent biochemical concepts namely Nucleic acids and recombinant DNA technology | | | | | | | | | | |
| LO5 | To learn about the diseases caused due to metabolic disorder. | | | | | | | | | | |
| Unit | Content | | | | | | | | | Hours | |
| 1 | Enzymes and metabolism of carbohydrates- Enzymes-classification, Factors affecting Enzyme activity. Carbohydrates classification, metabolism of glucose- Glycolysis, Krebs cycle, Gluconeogenesis, glycogenesis, glycogenolysis,(No structure) blood glucose maintenance and its regulation. | | | | | | | | | 12 | |
| 2 | Proteins - classification based on amino acid, primary, secondary and tertiary structure of proteins, hydrolysis of proteins, denaturation, precipitation and coagulation, Metabolism of Amino acids deamination, transamination, decarboxylation- urea cycle | | | | | | | | | 12 | |
| 3 | Lipids - chemical composition of fats, classification, metabolism - beta oxidation of fatty acids & bio-synthesis of fatty acids - ketone bodies, Ketogenesis and ketosis, cholesterol- biosynthesis. | | | | | | | | | 12 | |
| 4 | Metabolism of Nucleotides- Bio synthesis and degradation of Purine and Pyrimidine Nucleotides. Definition of nucleic acid, Functions and components of nucleic acids. DNA and RNA – Types, Structure and function. Recombinant DNA technology | | | | | | | | | 12 | |
| 5 | Metabolic disorders- Elementary knowledge on inborn errors of metabolism with reference to carbohydrate- Fructosuria, Pentos Uria, Galactosemia, Protein-albinism, Phenylketonuria, alkaptonuria, maple syrup urine disease, Lipids- Niemann- pick disease, Tay- Sach's disease. | | | | | | | | | 12 | |

| CO | Course Outcomes |
|-----------|---|
| | Students will be able to |
| CO1 | Describe the role of enzymes and metabolism and regulation of carbohydrates |
| CO2 | Analyze the integration of protein metabolism |
| CO3 | To understand about the metabolism of lipids and their synthesis |
| CO4 | Comprehend the significance of recent biochemical concepts namely Nucleic acids, recombinant DNA Technology |
| CO5 | To understand about the various disease due to metabolic disorders |

| 24UNDA32P | Practical-Metabolism of Nutrients | Core | 0 | 0 | 2 | 0 | 2 | 2 | 25 | 75 | 100 |
| Learning Objectives | | | | | | | | | | | |
| LO1 | Understand the qualitative estimation of Carbohydrates | | | | | | | | | | |
| LO2 | Recognize the importance of proteins and qualitative analysis | | | | | | | | | | |
| LO3 | Analyze the concept of qualitative analysis of Reducing sugars | | | | | | | | | | |
| LO4 | Learn the quantitative estimation in Reducing Sugar | | | | | | | | | | |
| LO5 | Develop skills in Iodine estimation in oil/fat. | | | | | | | | | | |
| Unit | Content | | | | | | | | | Hours | |
| 1 | Qualitative Analysis of Carbohydrates | | | | | | | | | 6 | |
| 2 | Qualitative Analysis of Proteins | | | | | | | | | 6 | |
| 3 | Qualitative test for Sugars-Glucose, Fructose, Lactose, Maltose, Galactose | | | | | | | | | 6 | |
| 4 | Quantitative Estimation in Reducing Sugar | | | | | | | | | 6 | |
| 5 | Quantitative Estimation of Iodine and Acid value in oil/fat | | | | | | | | | 6 | |

| CO | Course Outcomes |
|-----------|--|
| CO1 | Identify the presence of carbohydrates in biological samples using standard qualitative tests. |
| CO2 | To understand the proteins in biological samples using standard qualitative tests. |
| CO3 | Detect and differentiate various sugars such as glucose, fructose, lactose, maltose, and galactose using specific biochemical test |
| CO4 | Determine the iodine value of oils to assess the degree of unsaturation. |
| CO5 | Gain hands-on experience with biochemical testing and standard laboratory procedures. |

|-----------------|--|-------------|----------|----------|----------|----------|----------|----------|-------|----------|-------|
| | | | | | | | | | CIA | External | Total |
| 24UNDS31 | BASICS OF INTERIOR DESIGN AND DECOR | Core | 1 | 0 | 1 | 0 | 2 | 2 | 25 | 75 | 100 |

Learning Objectives

| | |
|------------|--|
| LO1 | Gain knowledge of the basic designing principles and characteristics. |
| LO2 | Develop ability to apply the above knowledge to create interesting and beautiful Interiors for varied purposes |
| LO3 | Identify the impact of design principles on space planning and décor. |
| LO4 | Understanding the Concept and characteristics of Color in Interiors. |
| LO5 | Understand the role of lighting in enhancing mood, functionality, and visual comfort. |

| Unit | Content | Hours |
|-------------|---|--------------|
| 1 | UNIT – 1-Design- Meaning and Definition, Types –Structural and Decorative design, their characteristics, classification of decorative design. | 6 |
| 2 | UNIT –2-Elements of Design - Meaning, various elements – line, form and shape, size, color, texture, pattern, space, light. | 6 |
| 3 | UNIT – 3-Principles of Design Harmony , Balance, Rhythm, Emphasis, proportion. Application of design principles in interiors | 6 |
| 4 | UNIT – 4-Color harmony - Concept, qualities – Hue, value, intensity Classification of colors, Prang color system, color harmonies – Related and contrasting color harmonies, psychology of color. Application of color in interiors. | 6 |
| 5 | UNIT – 5- Lighting in interiors - Importance, classification based on sources, uses, illumination, factors to be considered in lighting for different areas of house. | 6 |

| CO | Course Outcomes |
|-----------|---|
| | Students will be able to |
| CO1 | Learn the basic concepts and classification of interior design. |
| CO2 | Develop the skill of applying the principles of design in decorating the interiors. |
| CO3 | Analyze and implement balance, rhythm, and harmony in different spaces |
| CO4 | Understand the psychological impact of colors on human emotions and behavior. |
| CO5 | Understand the impact of lighting on mood, well-being, and space perception. |

| 24UNDC41 | CC-HUMAN NUTRITION | Core | 3 | 1 | 2 | 0 | 5 | 6 | 25 | 75 | 100 |
| Learning Objectives | | | | | | | | | | | |
| LO1 | Provide the importance of carbohydrates, dietary fiber, and water in maintaining overall health and well-Being. | | | | | | | | | | |
| LO2 | Apply their knowledge to calculate energy requirements, understand factors that affect energy Metabolism and dietary recommendations. | | | | | | | | | | |
| LO3 | Impart knowledge about protein nutrition and its implications for human health. | | | | | | | | | | |
| LO4 | Understand the effect of lipid on health status & Understand the Water-Soluble and fat-soluble Vitamins. | | | | | | | | | | |
| LO5 | Understand of minerals, including their roles in maintaining health, preventing disease, and Managing toxicity. | | | | | | | | | | |
| Unit | Content | | | | | | | | | Hours | |
| 1 | Carbohydrates & Water Basic concepts of Nutrient, Carbohydrates - Definition, Sources, requirements, Digestion and absorption. Dietary fiber- definition, Types-soluble and insoluble fiber, sources of fiber, role of fiber in human nutrition. Water -functions, water compartment, regulation, water balance and disorders. | | | | | | | | | 18 | |
| 2 | Energy Energy units, determination of energy value of foods using Bomb calorimeter, Physiological energy value of foods, determination of energy requirement using direct calorimetry, indirect calorimetry. BMR - determination of energy metabolism during work - energy requirements for various types of activities, recommended dietary allowances for energy for various age groups. | | | | | | | | | 18 | |
| 3 | Proteins- Classification, Sources, Requirements and functions of protein. Amino Acids -Indispensable and dispensable amino acids. Protein deficiency -Protein Energy Malnutrition- Kwashiorkor and Marasmus– etiology, clinical features, treatment and prevention. Evaluation of protein quality Protein Efficiency Ratio, Biological Value, Net Protein Utilization and Net Protein Ratio. | | | | | | | | | 18 | |
| 4 | Lipids Lipids - Definition, sources, requirements and functions. Digestion, absorption and metabolism. Essential Fatty Acids (EFA) - definition, functions, sources and effects of deficiency. Fat soluble vitamins and Water-soluble vitamins - functions, deficiency, sources and requirements. | | | | | | | | | 18 | |
| 5 | Minerals Macro minerals -Calcium, Phosphorous, Magnesium, Potassium, Sodium and Chloride Distribution in the body, functions, food sources, requirements, effects of deficiency and toxicity. Micro/Trace minerals -Iron, Zinc, Iodine, Fluoride and Copper Distribution in the body; functions, food sources, requirements, effects of deficiency and toxicity. | | | | | | | | | 18 | |

| CO | Course Outcomes |
|-----|---|
| CO1 | Understanding the basics of carbohydrates and water, optimal health and well-being. |
| CO2 | Understanding of energy metabolism, including determination of energy values and requirements. |
| CO3 | To analyze protein nutrition, protein quality, protein-energy malnutrition, and protein Supplementation. |
| CO4 | To identify the importance of lipids and vitamins, including their functions, deficiency symptoms, sources, and requirements, and will be able to apply this knowledge to promote optimal health and well-being |
| CO5 | Understand of minerals, including their roles in maintaining health, preventing disease, and managing toxicity. |

| Learning Objectives | | | | | | | | | | | |
| LO1 | Gain knowledge about bakery and confectionery and hygiene practice. | | | | | | | | | | |
| LO2 | Familiarize ingredients involved in varieties of baking. | | | | | | | | | | |
| LO3 | Understand the role of various ingredients used in cakes, bread and jelly cake. | | | | | | | | | | |
| LO4 | Acquire knowledge about the process involved in pastries, cookies, biscuits, pudding and pie . | | | | | | | | | | |
| LO5 | Marketing strategies involved in sales promotion of bakery and confectionery. | | | | | | | | | | |
| Unit | Content | | | | | | | | | | Hours |
| 1 | An Overview of Bakery Industry Introduction to bakery and confectionery, Scope of Baking, Terms used in Baking, Weights and measurements. Baking –principles and process. Equipment-tools used in baking and Confectionery. Bakery sanitation and personnel hygiene. | | | | | | | | | | 12 |
| 2 | Ingredients in Bakery and Confectionery Ingredients -Flour, Sugar, Shortenings, Egg. Leavening agents -yeast, baking soda, baking powder, chocolates, cocoa powder. Other ingredients - salt, milk and milk derivatives, malt products, dough improve ,oxidizing agents, flavours and colors, nuts, spices and condiments, preserved and candied fruit peels. | | | | | | | | | | 12 |
| 3 | Breads and Cakes Bread -ingredients, types of breads, faults and its prevention Cakes –ingredients, types of cakes, cake judging, faults and remedies. Jelly cake –ingredients and Processing of jelly fruit cake Modified baked goods –using alternative healthy ingredients for special dietary needs. Different types and techniques of cake decoration-icings and fillings. | | | | | | | | | | 12 |
| 4 | Pastries, Cookies and Biscuits Pastries -types of pastries-puff pastry, short crust, phyllo pastry, flaky pastry, choux pastry Cookies & biscuits –ingredients, types and processing, millet cookies and Coconut macaroons. Pudding & Pies - millet pudding, trifle pudding, almond crunch pudding Apple and pineapple pie. | | | | | | | | | | 12 |
| 5 | Confectionery and Marketing of Baked Products Chocolates-production, types, chocolate decorations Sugar based confectionery–fudge, fondant, sugar candies. Marketing and sales promotion -costing, packaging and labeling. | | | | | | | | | | 12 |

| CO | Course Outcomes |
|-----|---|
| CO1 | Understand the principles and process of baking and confectionery. |
| CO2 | Acquire knowledge on various ingredients and its role in baking and confectionery |
| CO3 | Develop skills to use of alternative healthy ingredients to dietary needs |
| CO4 | Acquire skill to bake pastries ,cookies and biscuits |
| CO5 | Enhance entrepreneurial skills in bakery and confectionery to improve business. |

| LO4 | Acquire knowledge about the process involved in pastries, cookies, biscuits, pudding and pie . | | | | | | | | | | |
| LO5 | Marketing strategies involved in sales promotion of bakery and confectionery | | | | | | | | | | |
| Unit | Content | | | | | | | | Hours | | |
| 1 | Baking & Hygiene Practices Terms used in Baking ,Weights, measurements, tools involved in baking and hygiene practices. | | | | | | | | 6 | | |
| 2 | Ingredients in Bakery and Confectionery Ingredients , Leavening agents, Other ingredients, Oxidizing agents Preparation of buns, rolls and pizza base. | | | | | | | | 6 | | |
| 3 | Breads and Cakes -Preparation of butter cake, sponge cake, chocolate cake, cupcake. Modified baked products - High Fiber, alternative sugar, low fat and millet based bakery products for special nutritional requirements –Obesity, Diabetes Mellitus. | | | | | | | | 6 | | |
| 4 | Pastries, Cookies and Biscuits Preparation of biscuits, cookies. Preparation of Pies. | | | | | | | | 6 | | |
| 5 | Confectionery and Marketing of Baked Products Preparation of fudge, fondant and candies. Marketing strategies. | | | | | | | | 6 | | |

| CO | Course Outcomes |
|-----|--|
| CO1 | Understand the principles and process of baking and confectionery. |
| CO2 | Acquire knowledge on various ingredients and its role in baking and confectionery. |
| CO3 | Develop skills to use of alternative healthy ingredients to dietary needs. |
| CO4 | Acquire skill to bake pastries, cookies and biscuits. |
| CO5 | Enhance entrepreneurial skills in bakery and confectionery to improve business. |

| Learning Objectives | | | | | | | | | | | |
| LO1 | To understand the principles of meal planning and Nutrition for adults | | | | | | | | | | |
| LO2 | To Explain nutritional needs and their impact on maternal and fetal health during pregnancy and Lactation | | | | | | | | | | |
| LO3 | To understand the growth, feeding practices, and nutritional needs for different age groups | | | | | | | | | | |
| LO4 | To Analyze nutritional needs, eating habits, and common health issues in school children and adolescents. | | | | | | | | | | |
| LO5 | To Understand physiological changes and plan appropriate diets for elders. | | | | | | | | | | |
| Unit | Content | | | | | | | | | Hours | |
| 1 | <p>Human Nutrition Across Adulthood:</p> <p>Introduction to meal planning – Balanced diet – Food groups – Food Guide Pyramid (ICMR) – Food Plate and My Plate for (Eat right India) Recommended Dietary Allowances (RDA) – Factors affecting RDA – Principles and steps involved in meal planning.</p> <p>Nutrition for adults – Reference man and reference woman – Nutritional requirements – Planning balanced diets for adult men and women – Promotion of healthy lifestyle through holistic approach.</p> | | | | | | | | | 15 | |
| 2 | <p>Maternal Nutrition and Lactation</p> <p>Pregnancy: Physiological changes and nutritional requirements – Effect of nutrition on pregnancy outcome – Optimal weight gain – Nutrition-related problems and complications during pregnancy – Meal planning for pregnant women.</p> <p>Lactation: Physiology of lactation – Nutritional requirements – Nutritional concerns of breastfeeding mothers – Meal planning for lactating women.</p> | | | | | | | | | 15 | |

| | | |
|---|---|----|
| 3 | <p>Infant and Preschool Nutrition: Infant nutrition and feeding practices – Growth and development – Growth standards – Food and nutritional requirements – Breastfeeding and artificial feeding – Nutrition for low birth weight and preterm babies – Complementary feeding – Meal planning for infants.</p> <p>Nutrition for preschool children – Growth and development – Food and nutritional requirements – Eating habits and food behaviours – Nutrition-related problems: PEM and VAD – Dietary interventions – Meal planning for infants.</p> | 15 |
| 4 | <p>Nutrition and Health Across School-age and Adolescence: Nutrition for school children – Physical growth patterns – Nutritional requirements – Importance of healthy snacks – Factors affecting eating habits – School lunch – Meal planning for school children.</p> <p>Nutrition during adolescence – Physiological and developmental changes – Nutritional requirements – Food habits – Nutritional problems: Obesity, underweight, anaemia and eating disorders – Meal planning for adolescents.</p> | 15 |
| 5 | <p>Gerontology and Healthy Ageing: Physiological changes during ageing – Food and nutritional requirements – Nutritional and health concerns in old age – Dietary modifications for elderly – Nutrition in age-related disorders – Hydration and immune health – Healthy lifestyle and meal planning for elderly.</p> | 15 |

| CO | Course Outcomes |
|-----|---|
| CO1 | Understand the role of interventions to enhance wellness in diverse individuals and Groups |
| CO2 | Skills to develop an educational program for a target population |
| CO3 | Apply various methods of nutritional assessment, including anthropometric, biochemical, clinical, dietary, and indirect assessment techniques for identifying nutritional status and risk groups. |
| CO4 | Discuss national and international nutrition policies, agencies, and programmes related to nutrition intervention, surveillance, and public health improvement. |
| CO5 | Evaluate strategies used to combat nutritional problems such as food fortification, enrichment, supplementation, immunization, and nutrition education programmes. |

| LO2 | Plan therapeutic diets based on disease condition, severity, and recovery stage. | | | | | | | | | | |
| LO3 | Design appropriate diet modifications for hepatobiliary disorders such as hepatitis, cirrhosis, Cholelithiasis, and pancreatitis. | | | | | | | | | | |
| LO4 | Prepare low-fiber, high-fiber, soft, and GERD-friendly diets based on clinical needs. | | | | | | | | | | |
| LO5 | Apply dietary strategies to prevent binge-purge cycles through structured meal planning. | | | | | | | | | | |
| Unit | Content | | | | | | | | | Hours | |
| 1 | Meal Planning <ul style="list-style-type: none"> • Portion control meal planning • Mindful eating-based diet charts • Normalized meal pattern planning (structured eating) | | | | | | | | | 9 | |
| 2 | Routine Hospital Diet: <p>a) Planning and Preparation of diets for the following Conditions/stages:</p> <ul style="list-style-type: none"> • Clear Fluid • Full Fluid • Soft diet <p>b) Planning and Preparation of diets for the following febrile Conditions & Infections:</p> <ul style="list-style-type: none"> • Influenza, typhoid, • tuberculosis, HIV • Dengue | | | | | | | | | 9 | |
| 3 | Planning and Preparation of diets for the following Conditions/stages: | | | | | | | | | 9 | |

| | | |
|---|---|---|
| | <ul style="list-style-type: none"> • Hepatitis • Cirrhosis • Cholelithiasis and Pancreatitis • COPD and Chronic Bronchitis | |
| 4 | Planning and Preparation of diets for the following Conditions/stages: <ul style="list-style-type: none"> • Diarrhea • Constipation • Irritable Bowel Syndrome (IBS) • GERD | 9 |
| 5 | Nutrition in Eating Disorder: <ol style="list-style-type: none"> Case Study – Anorexia Nervosa <ul style="list-style-type: none"> • Assess dietary intake, BMI and nutritional deficiencies. • Plan a high-calorie, nutrient-dense diet for recovery. Case Study – Bulimia Nervosa <ul style="list-style-type: none"> • Analyse binge–purge eating patterns. • Prepare meal plans to normalize eating behaviour and electrolyte balance. Case Study – Binge Eating Disorder <ul style="list-style-type: none"> • Record emotional eating triggers and food frequency patterns. • Develop balanced meal plans focusing on portion control and satiety. | 9 |

| CO | Course Outcomes | Knowledge Level |
|-----|---|-----------------|
| CO1 | Prepare and modify different hospital diets (liquid, soft, semi-solid, and regular) based on patient requirements. | K2 |
| CO2 | Demonstrate knowledge of nutritional requirements in infectious diseases such as influenza, typhoid, tuberculosis, malaria, and dengue. | K3 |
| CO3 | Design appropriate modified diets such as low-fat, high-protein, energy-dense, and fluid-controlled diets. | K1 |
| CO4 | Plan and prepare therapeutic diets appropriate for different GI conditions and clinical symptoms | K4 |
| CO5 | Design portion-controlled meal plans suitable for maintaining healthy eating patterns. | K5 |

| 24UNDA51 | EC-8 Community Nutrition | EC | 4 | 1 | 0 | 0 | 4 | 5 | 25 | 75 | 100 |
| Learning Objectives | | | | | | | | | | | |
| LO1 | Understand role of Community Nutrition to maintain the health status | | | | | | | | | | |
| LO2 | Understand nutrition problems existing in the community | | | | | | | | | | |
| LO3 | Identify risk groups and explain the use of sampling techniques and growth charts in nutritional assessment. | | | | | | | | | | |
| LO4 | Knowledge to apply nutrition policy and programs in alleviating nutritional problems. | | | | | | | | | | |
| LO5 | Develop the ability to plan and implement community-based nutrition education and intervention programmes. | | | | | | | | | | |
| Unit | Content | | | | | | | | Hours | | |
| 1 | Nutrition and Health in National Development - Concept of Community, Types of Community, Factors affecting the health of community. Malnutrition - Etiology, symptoms, Prevalence of malnutrition, factors contributing to malnutrition - Under nutrition and Over nutrition. | | | | | | | | 15 | | |
| 2 | Nutritional problems confronting our country – Protein Energy Malnutrition - Prevalence, classification - Kwashiorkor and Marasmus - etiology, symptoms, pathological changes, biochemical changes. Prevalence, etiology, symptoms, prophylaxis Programmes - Anaemia, IDD and Vitamin A deficiency | | | | | | | | 15 | | |
| 3 | Methods of assessment of Nutritional status - sampling techniques - identification of risk group. Direct methods - anthropometry, biochemical estimation, clinical, and diet survey. Indirect methods - Food balance sheet, Ecological parameter and vital statistics, use of growth chart. | | | | | | | | 15 | | |

| | | |
|---|---|----|
| 4 | Nutrition policy and programmes - National Nutrition policy - need for nutrition policy, policy strategies and their implementation - ICDS, Noon Meal Programme, FAO, WHO, UNICEF, CARE, ICMR, ICAR, CSIR, NIN, CFTRI, NGOs, National Nutrition surveillance system, National prophylaxis programmes for IDA, VAD and IDD. | 15 |
| 5 | Strategies to combat Nutritional problems -fortification, enrichment, supplementation and Immunization programmes. Nutrition Education - Meaning, Scope, Methods - Planning, conduct and evaluation of Nutrition education Programme. | 15 |

| CO | Course Outcomes |
|-----|---|
| CO1 | Understand the role of interventions to enhance wellness in diverse individuals and groups |
| CO2 | Skills to develop an educational program for a target population |
| CO3 | Apply various methods of nutritional assessment, including anthropometric, biochemical, clinical, dietary, and indirect assessment techniques for identifying nutritional status and risk groups. |
| CO4 | Discuss national and international nutrition policies, agencies, and programmes related to nutrition intervention, surveillance, and public health improvement. |
| CO5 | Evaluate strategies used to combat nutritional problems such as food fortification, enrichment, supplementation, immunization, and nutrition education programmes. |

| Learning Objectives | | | | | | | | | | | |
| LO1 | To Learn the basic concepts and importance of Food Preservation | | | | | | | | | | |
| LO2 | To Understand the different methods of Food Preservation | | | | | | | | | | |
| LO3 | To Understand the High Temperature Preservations and processing techniques | | | | | | | | | | |
| LO4 | To Analyze the effects of low temperature on microorganisms and enzymes. | | | | | | | | | | |
| LO5 | To Evaluate the use of preservatives in squashes, ketchup, and marmalade. | | | | | | | | | | |
| Unit | Content | | | | | | | | | Hours | |
| 1 | <p>Food preservation: Concept, importance, principles, Common terms used in food preservation. Different methods and Principles of preservation.</p> <p>Food processing: Concept, importance, Applications and Equipments used in food Processing</p> <p>Food Spoilage – Definition causes, Food storage – Importance, changes during food storage. Qualitative and quantitative deterioration in Food Spoilage</p> | | | | | | | | | 15 | |
| 2 | <p>Methods of food preservation: Traditional preservation methods, preservation by low temperature, Preservation by preservatives, Preservation by Chemical and Osmotic Preservation. Hurdle Technology. High Pressure processing High concentration of sugar, High concentration of salt. Preservation by dehydration. Food irradiation. Sustainable Preservation</p> | | | | | | | | | 15 | |
| 3 | <p>Food preservation by high temperature: Thermal and Non Thermal Processing- Commercial heat preservation methods – Sterilization, commercial sterilization, Pasteurization, and Canning – bottling. Pulsed Electric Fields (PEF) Cold plasma, UV radiation. Minimal processing</p> | | | | | | | | | 15 | |

| | | |
|---|---|----|
| | techniques, Clean-label preservation. | |
| 4 | Food preservation by Low temperature: Introduction, Stages, Principles, Methods of Low Temperature preservation, Effects of Low temperature on microorganism, Advantage & disadvantage of Low Temperature, Limitations, Temperature changes during storage. Emerging innovative Techniques, Integration with Multi-Hurdle Approach. | 15 |
| 5 | Preservation using Chemicals and Irradiation: Introduction. Types of Chemical Preservatives. Preservation using Chemical preservatives- Squashes, Ketchup and Marmalade Preservation by Irradiation: Gamma rays, X-rays and Electron Beam Preservation. Advantages and Limitations of Chemical Preservatives. Emerging Trends in natural preservatives Vs Chemical Preservatives | 15 |

| CO | Course Outcomes | Knowledge Level |
|-----|--|-----------------|
| CO1 | To understand the concept, importance, and applications of food processing. | K1, K2, K3 |
| CO2 | To Develop sustainable and innovative strategies for food preservation. | K1, K2, K3, K4 |
| CO3 | To Develop innovative and sustainable food preservation strategies using clean-label approaches. | K1, K2, K3 |
| CO4 | To Analyze the impact of low temperature on microbial activity and food quality. | K1, K2, K3, K4 |
| CO5 | To Understand the knowledge of chemical and irradiation preservation Methods | K1, K2, K3, K4 |

| Learning Objectives | | | | | | | | | | | |
| LO1 | To understand the structure and types of food service industries. | | | | | | | | | | |
| LO2 | To develop knowledge on kitchen planning and food purchasing. | | | | | | | | | | |
| LO3 | To gain skills in quantity food service and menu planning. | | | | | | | | | | |
| LO4 | To understand management principles in food service establishments. | | | | | | | | | | |
| LO5 | To acquire knowledge on personnel, financial management, sanitation, and safety. | | | | | | | | | | |
| Unit | Content | | | | | | | | | | Hours |
| 1 | Food Service Industry: Food service industry – definition and scope. Types of catering: Commercial catering – hotel, motel, restaurant, cafeteria, chain hotels and cloud kitchen. Welfare catering – hospital, school lunch, residential establishments, industrial and corporate food service. Transport catering – air, train, sea and space catering. Miscellaneous catering – contract catering and outdoor catering. | | | | | | | | | | 15 |
| 2 | Kitchen Planning and Food Purchase: Layout of kitchens – Types of kitchens – Planning of receiving, preparation, storage and service areas – Principles of workflow and space allocation – Kitchen safety and sanitation – Food purchase procedures – Purchasing methods – Factors involved in the selection of food – Receiving and storage of food materials – Inventory control – Waste management and sustainable kitchen practices. | | | | | | | | | | 15 |
| 3 | Quantity Food Service and Menu Planning: Quantity food service – definition and objectives. Styles of service: waiter service, self-service and vending. Mechanics of waiter service.. Menu planning – origin and importance. Types of menu: Table d’hôte, À la carte, Du jour, theme, static and cycle menu. French classical menu, menu construction and design. Factors affecting menu planning. Standardization of recipes, portion control, stepping up and stepping down of recipes. | | | | | | | | | | 15 |
| 4 | Management: Management – Definition, principles – Functions and tools of management – Leadership: qualities of a good leader, styles of leadership. Resource management – Money, Time, Energy – Computer applications in menu planning. | | | | | | | | | | 15 |
| 5 | Personnel, Financial Management and Safety: Personnel management – Recruitment, selection, induction. Financial management – Cost control – Methods of food cost control – Bookkeeping – Advantages of double entry system. Sanitation and safety – Plant sanitation, kitchen hygiene, personal hygiene – First aid principles and practices – Health and safety at work. | | | | | | | | | | 15 |

| CO | Course Outcomes |
|-----|--|
| CO1 | Explain the types and functions of food service industries. |
| CO2 | Plan kitchen layout and food purchasing procedures. |
| CO3 | Apply quantity food service principles and menu planning techniques. |
| CO4 | Understand management and leadership in food service. |
| CO5 | Apply personnel, financial, sanitation, and safety practices. |

| Learning Objectives | | | | | | | | | | | |
| LO1 | To understand the concept and stages of human growth and development. | | | | | | | | | | |
| LO2 | To gain knowledge about prenatal, postnatal, and infant development. | | | | | | | | | | |
| LO3 | To study developmental changes during childhood and adolescence. | | | | | | | | | | |
| LO4 | To understand adulthood and ageing processes. | | | | | | | | | | |
| LO5 | To identify developmental problems and their management. | | | | | | | | | | |
| Unit | Content | | | | | | | | | Hours | |
| 1 | Introduction to Human Development: Meaning, scope and principles of human development – Growth and development: concepts and differences – Factors influencing human development: heredity, environment, nutrition and family – Stages of human development: infancy, childhood, adolescence, adulthood and old age – Developmental tasks and milestones across the lifespan. | | | | | | | | | 15 | |
| 2 | Prenatal and Postnatal Development: Prenatal development – Conception – Test tube baby – Periods of prenatal development – Signs of pregnancy. Prenatal care – Management of normal pregnancy: hygiene, diet and medical supervision – Hazards during pregnancy Labour – Signs and stages of labour – Types of birth – Multiple pregnancy. Postnatal care – Prevention of gynaecological complications. Adjustment of the newborn – temperature regulation, breathing, feeding and elimination. | | | | | | | | | 15 | |
| 3 | Infancy (Birth to 2 Years): Infancy development – Physical and motor, social, emotional, cognitive and language development – Minor ailments. Effect of stimulation – Care of infants – Feeding, toilet training, bathing, clothing, sleeping and immunization. Prevention of accidents – Importance of mothering and emotional growth – Psychological needs of infants. | | | | | | | | | 15 | |
| 4 | Childhood Development: Early Childhood (2–6 years) Physical and motor development – Emotional, social, cognitive and language development – Creativity – Importance of play – Family relationships – Behaviour problems: causes and treatment – Importance of preschool education. Late Childhood (6–12 years) Physical, social, emotional, cognitive and language development – Sex education. Children with special needs – Identification and rehabilitation. | | | | | | | | | 15 | |

| | | |
|---|---|----|
| 5 | <p>Adolescence, Adulthood and Old Age:</p> <p>Adolescence (12–18 years) – Physical, emotional, intellectual and motor development – Personal adjustment and maladjustment. Delinquency – Causes, prevention and rehabilitation – Drug addiction and alcoholism – Rehabilitation.</p> <p>Adulthood (18–60 years) – Characteristics and developmental tasks – All aspects of development including vocational development.</p> <p>Old Age (60 years and above) - Physical, psychological, emotional and social changes during old age – Problems of the aged – Family attitude towards the elderly – Role and status of aged in Indian society – Adjustment and wellbeing in old age.</p> | 15 |
|---|---|----|

| CO | Course Outcomes |
|-----|--|
| CO1 | Explain principles and stages of human development. |
| CO2 | Describe prenatal and postnatal development and care. |
| CO3 | Analyze growth and development during infancy and childhood. |
| CO4 | Evaluate developmental changes during adolescence. |
| CO5 | Understand adulthood, ageing, and related issues. |

| 24UNDA62 | EC -10 Hospital Food Service Administration | EC | 4 | 1 | 0 | 0 | 4 | 5 | 25 | 75 | 100 |
| Learning Objectives | | | | | | | | | | | |
| LO1 | Identify the changing healthcare needs and expectations of patients in contemporary society. | | | | | | | | | | |
| LO2 | Develop awareness of patient-centered care and quality service delivery in hospitals. | | | | | | | | | | |
| LO3 | Understand the structure and functioning of corporate multi-specialty hospitals. | | | | | | | | | | |
| LO4 | Develop awareness of integrated management systems in modern healthcare organizations. | | | | | | | | | | |
| LO5 | Understand the importance of coordination between dietitians, kitchen staff, and nursing personnel. | | | | | | | | | | |
| Unit | Content | | | | | | | | | Hours | |
| 1 | Hospital based health care and its changing scenario, Effects of globalization on health care, concepts of corporate hospitals in developing countries, infrastructure and lay out of an ideal corporate hospital, functioning of modern hospital and changing needs of patients. | | | | | | | | | 15 | |
| 2 | Patient Care Services, Patient Admission / discharge, cafeteria and dietary services, front office services, housekeeping services, blood bank, diagnostic services, lab, physiotherapy, pharmacy operation theatre, outpatient and inpatient ward -admission. | | | | | | | | | 15 | |
| 3 | Principles of hospital management, managerial activities for effective hospital functioning duties and responsibilities of hospital managers, qualities of office managers, effective inter and intra departmental co-ordination, understanding functioning of corporate multi-specialty hospital. | | | | | | | | | 15 | |
| 4 | Marketing and Material management, Human resource management, managerial accounting and financial management, importance of material management, principles of material management, inventory management. Point of sale systems (POS) and property management systems. (PMS) | | | | | | | | | 15 | |
| 5 | Hospitality in hospital care-management of dietary department, diet planning for hospital diets, purchasing, storage and quantity food production, patient compliance, food production, serving to patient- tray and trolley service, plate, waste management, washing and garbage disposal. | | | | | | | | | 15 | |

| CO | Course Outcomes |
|-----|--|
| CO1 | Describe the infrastructure, layout, and essential requirements of an ideal corporate hospital. |
| CO2 | Explain the organization and importance of clinical services including laboratory, blood bank, diagnostic services, physiotherapy, and operation theatre |
| CO3 | Analyze the functioning of corporate multi-specialty hospitals and their approach to patient-centered care |
| CO4 | Analyze the role of Point of Sale (POS) systems and Property Management Systems (PMS) in modern hospital and healthcare operations. |
| CO5 | Analyze waste management practices including washing, garbage disposal, and hygiene maintenance in hospital dietary departments |

| 24UNDA63 | EC-11 Food Standard & Quality Control | EC | 4 | 1 | 0 | 0 | 4 | 5 | 25 | 75 | 100 |
| Learning Objectives | | | | | | | | | | | |
| LO1 | To Apply quality control, principles in food processing and handling systems. | | | | | | | | | | |
| LO2 | To Understand the concepts of Government Regulations in Quality control | | | | | | | | | | |
| LO3 | To Understand the needs of food regulations and patent laws in quality Control | | | | | | | | | | |
| LO4 | To Analyze the Inspection protocols for Quality Management | | | | | | | | | | |
| LO5 | To Understand the Knowledge based food hazards and food adulteration. | | | | | | | | | | |
| Unit | Content | | | | | | | | | | Hours |
| 1 | Quality Control: Objectives, Importance, functions of quality control, stages of quality control in food industry. Food Quality Assurance, Microbiological concerns. Good Manufacturing Practices (GMP), Good Hygienic Practices (GHP), Standard Operating Procedures (SOPs) | | | | | | | | | | 15 |
| 2 | Government Regulations In Quality Control: FAO/WHO codex Alimentations commission, PFA, AGMARK, BIS, FPO, FSSAI, fair average quality (FAQ) specification for food grains, ISO 9000 series. HACCP: Principles, benefits and limitation. Consumer Protection Act (CPA) | | | | | | | | | | 15 |
| 3 | Food Safety: Meaning of food safety. Importance of Food Quality and safety for developing countries. Patent: Definition, requirements, patent law in India, administrator, need for patent system, advantages, precautions to be taken by applicants, patent procedures, non-patentable. | | | | | | | | | | 15 |
| 4 | Inspection Protocols: Preparation of HACCP based SOP Analysis - personal hygiene, food preparation, hot holding, cold holding, refrigerator, freezer and milk cooler, food storage and dry storage, cleaning and sanitizing, utensils and equipments, large equipments, garbage storage and disposal and pest control. | | | | | | | | | | 15 |
| 5 | Food Hazards: Physical, Chemical, Biological hazards associated with food types. Effect of processing and storage on microbial safety. Food Adulterator: Adulteration of food - common adulterants and tests detect common adulterants. Risk Assessment. Food Toxicants and Contaminants. Rapid Detection Techniques. | | | | | | | | | | 15 |

| CO | Course Outcomes |
|-----|---|
| CO1 | Identify microbiological concerns affecting food safety and quality. |
| CO2 | Apply regulatory guidelines in food quality control and safety practices. |
| CO3 | Evaluate the legal and regulatory framework governing patents in India. |
| CO4 | Demonstrate knowledge of inspection protocols and HACCP-based SOP analysis in food safety management. |
| CO5 | Apply methods to detect adulterants and ensure food safety. |

| 24UNDA64 | EC-11 Nutraceuticals and Nutrigenomics | Core | 4 | 1 | 0 | 0 | 4 | 5 | 25 | 75 | 100 |
| Learning Objectives | | | | | | | | | | | |
| LO1 | Learn to define Nutraceuticals and nutrigenomics. | | | | | | | | | | |
| LO2 | Understand the role of dietary supplements and nutraceuticals in health and disease. | | | | | | | | | | |
| LO3 | Knowledge to classify the probiotics and prebiotics. | | | | | | | | | | |
| LO4 | Acquire knowledge for the application of nutrigenomics in health and disease. | | | | | | | | | | |
| LO5 | Identify dietary strategies that may help in modifying gene expression for disease prevention | | | | | | | | | | |
| Unit | Content | | | | | | | | | Hours | |
| 1 | Definition of functional and traditional foods, nutraceuticals, designer foods and pharma foods, history of functional foods, components of functional foods, foods containing nutraceuticals and classification of nutraceuticals - based on plant sources, mechanism of action and chemical nature. | | | | | | | | | 15 | |
| 2 | Concept of dietary supplements, sources and functions of phytochemicals with suitable examples, FOSHU foods - concepts, regulatory aspects. | | | | | | | | | 15 | |
| 3 | Human gastrointestinal tract and its microbiota, functions, concept of probiotic, prebiotics and symbiotics; applications of probiotics in human nutrition. | | | | | | | | | 15 | |
| 4 | Definition of nutrigenomics, gene expression - transcription, translation, post translational modification, nutrition in the omics era- elementary concepts on epigenetics, transcriptomics, proteomics, metabolomics; genetic variation and nutritional implications. | | | | | | | | | 15 | |
| 5 | Nutrient control of gene expression - amino acids, nucleotides, basic concepts of nutrigenomics and complex diseases - diabetes, cancer and obesity. | | | | | | | | | 15 | |

| CO | Course Outcomes |
|-----|---|
| CO1 | Understand the developments in the field of nutraceuticals and nutrigenomics |
| CO2 | Comprehend the components of functional foods and foods containing of \ nutraceuticals |
| CO3 | Know the importance of probiotics and prebiotics in human health |
| CO4 | Understanding the effects of nutrients in molecular level in the body and the effect of phytochemicals in disease in disease conditions |
| CO5 | Articulate and advocate the principle of nutrigenomics in controlling life style disease |

| 24UNDP61 | PEC -1 Nutritional Assessment and Diet Counseling | PEC | 1 | 1 | 0 | 0 | 2 | 2 | 25 | 75 | 100 |
| Learning Objectives | | | | | | | | | | | |
| LO1 | To explain the principles of nutrition and categorize nutrients based on their sources | | | | | | | | | | |
| LO2 | To demonstrate knowledge of dietary assessment methods and their applications | | | | | | | | | | |
| LO3 | To analyze various nutritional disorders and their underlying causes | | | | | | | | | | |
| LO4 | To evaluate the role of diet counseling in promoting health and disease | | | | | | | | | | |
| LO5 | To design and implement therapeutic diets for Managing specific conditions | | | | | | | | | | |
| Unit | Content | | | | | | | | | | Hours |
| 1 | Basics of Nutrition & Nutritional Assessment: Definition of nutrition and nutrients. Classification into macronutrients and micronutrients. Functions of food, concept of balanced diet, and nutritional requirements across life stages. Introduction to nutritional assessment and its methods including anthropometric, biochemical, clinical, and dietary assessment techniques. | | | | | | | | | | 6 |
| 2 | Anthropometry & Dietary Assessment Techniques: Anthropometric measurements including height, weight, BMI, waist-hip ratio, and skin fold thickness. Growth charts and interpretation. Dietary survey methods such as 24-hour recall, food diary, and weighing method. Nutrient calculation, interpretation, and errors in dietary assessment. | | | | | | | | | | 6 |
| 3 | Nutritional Deficiency & Problems Clinical signs and symptoms of nutrient deficiencies. Protein-energy malnutrition (PEM). Vitamin deficiencies (A, D, C, B-complex) and mineral deficiencies (Iron, Iodine, Calcium). Lifestyle disorders including obesity, diabetes mellitus, and hypertension. | | | | | | | | | | 6 |
| 4 | Principles of Diet Counseling: Concept and importance of diet counseling. Steps in counseling including assessment, diagnosis, intervention, and monitoring. Communication skills, behavior change techniques, ethics in counseling, and use of dietary guidelines and food pyramids. | | | | | | | | | | 6 |
| 5 | Diet Planning & Therapeutic Diets: Principles of meal planning and menu planning for children, adolescents, and elderly. Therapeutic diets including diabetic, low-fat, high-protein, and low-sodium diets. Nutrition education tools and practical diet counseling sessions. | | | | | | | | | | 6 |

| CO | Course Outcomes |
|-----|---|
| CO1 | Analyzes the functions of food and importance of a balanced diet. |
| CO2 | Explain the principles and importance of anthropometric measurements in nutritional assessment. |
| CO3 | Apply Nutritional knowledge to assess and manage common nutrition-related disorders. |
| CO4 | Demonstrate effective communication skills required for successful counseling. |
| CO5 | Evaluate the effectiveness of counseling and modify diet plans accordingly. |

| Learning Objectives | | | | | | | | | | | |
| LO1 | To understand the fundamental concepts, principles and types of exercise and sports | | | | | | | | | | |
| LO2 | To understand the Apply techniques for assessing fitness and body composition | | | | | | | | | | |
| LO3 | To Analyze the role of micro and macronutrients in sports performance | | | | | | | | | | |
| LO4 | To evaluate nutritional strategies for competition and performance | | | | | | | | | | |
| LO5 | To Assess dietary requirements for special populations and athletes | | | | | | | | | | |
| Unit | Content | | | | | | | | | Hours | |
| 1 | Fundamentals of Exercise & Sports - Concepts of sports, games and exercise; Principles of exercise (overload, specificity, progression); Importance, advantages and limitations of exercise; Types of exercise: Aerobic, Resistance training, Isometric and isotonic exercises Yoga and flexibility exercises. | | | | | | | | | 9 | |
| 2 | Fitness & Body Composition Assessment -Body composition: BMI, body fat %, somatotyping, ideal body weight Muscle mass and bone mass assessment; Components of fitness: strength, endurance, flexibility, power; Cardio respiratory fitness tests: VO ₂ max, Harvard Step Test, Walk and run tests, Physical Work Capacity (PWC); Exercise testing using treadmill and cycle ergo meter. | | | | | | | | | 9 | |
| 3 | Micro & Macro nutrients in sports Micronutrients - vitamins and mineral requirements in athletes, sports anemia, antioxidants and exercise induced free radicals. Macronutrients - Carbohydrates: types, glycemic index, carbohydrate loading, carbohydrate counting and fueling strategies; Fats: role in exercise and factors affecting fat oxidation; Proteins: requirements, metabolism and recovery. | | | | | | | | | 9 | |
| 4 | Nutrient timing – Pre-competition nutritional guidelines – Nutrition during exercise and nutrition after exercise – Nutrition planning for sports events. Sports foods – Sports drinks, sports gels, energy bars and protein supplements for pre-, during and post-exercise meals – Dietary supplements – MCT diets – Antioxidant-rich dietary supplements and their role in sports performance. | | | | | | | | | 9 | |
| 5 | Nutrition for athletes with special dietary needs -Nutrition for special population - children, young and older athlete, Female athletes tried, weight loss and weight gain in athletes, vegetarian athlete, diabetic athlete. Factors affects nutritional needs for travel athletes. Nutrition for special populations: Child, young and older athletes – Female | | | | | | | | | 9 | |

| |
|---|
| athlete triad – Vegetarian and diabetic athletes – Weight gain and weight loss in athletes – Factors affecting nutritional needs of travelling athletes – Dietary modifications and meal planning for athletes. |
|---|

| CO | Course Outcomes |
|-----|---|
| CO1 | Explain concepts, principles and classifications of exercise and sports |
| CO2 | Perform and interpret fitness and body composition assessments |
| CO3 | Analyze the role of nutrients in exercise metabolism and performance |
| CO4 | Design nutrition plans for competition and evaluate Sports foods |
| CO5 | Assess and plan nutrition for athletes with special dietary needs |
