DEPARTMENT OF CHEMISTRY
REPORT**

Our second session our Resource person Dr.P.K.Mohamed Imran sir, Associate Professor, Department of Chemistry, Islamiah College(Autonomous), Vaniyambadi Sir delivered his webinar in this topic Cheminformatics; An aid in drug lead and discovery. In this current situation using technology how we can do innovative in drugs. Thank you sir.

On second day in first session our Resource person Dr.L.Akilandeshwari mam, Assistant Professor, Department of Chemistry, Sri Sarada College for women, Salem. In this topic let's Nurture and Nourish passion in chemistry. Mam's presentation and talk motivated to everyone how to take innovative class to students
Thank you mam

On third day our Resource person Dr.Theerthagiri Jayaraman, Korean Research fellow chemistry, Research Institute of Nature Sciences, Gyeongsang National University, South Korea. Sir delivered his webinar in this topic named as High efficient electro active Nanomaterial for energy conservation application. Nanomaterial application related to energy conservation in super capacitors, hydrogen storage which is all developing factors of tomorrow's future. Thank you sir

On third day second session our Resource person Dr.Srinivasan Anandan, Scientist-E, Centre for Nanomaterial, ARCH, Hyderabad. Sir proposed his webinar in this topic followed as Large scale synthesised high performance electrode materials for energy storage application.

In Energy storage we can theoretically prove in many ways as a prototyping device it is required to be real and working system.

Hope all these three days are enlightened your knowledge. All the different corners of chemistry is covered. Thank you once again for everyone
