Objectives

To raise awareness about carbon emissions and promote eco-friendly transport and energy-saving habits.

Summary Report

Zero Emission Day was observed to promote awareness about reducing carbon footprints and adopting sustainable lifestyles. The event aimed to educate students on the environmental impact of greenhouse gas emissions and encourage eco-friendly alternatives for daily activities.

To make the initiative practical, students participated in a "No Fuel Day" where they commuted walked, or carpooled to advocate for pollution-free transportation. Additionally, students conducted a survey to analyze daily transport habits and suggested ways to reduce emissions, such as promoting carpooling and reducing unnecessary vehicle use.

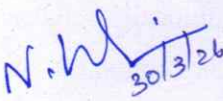

The goal of the program is to encourage individuals to adopt zero-emission practices and contribute to a cleaner environment and to highlight the importance of reducing reliance on fossil fuels and adopting sustainable alternatives.

Outcome of the Program

- Increased awareness about carbon footprints and eco-friendly transportation.
- Students and Staff opted for carpooling.

Participants Count :

Internal Participants : Faculty 10 ; Students 25
External Participants : Faculty Nil ; Students Nil
