Activity Report

Topic/ Subject of the Activity : Kala Aayvu (Field Work).

Objective

- To understand the importance of nature-based education and environmental conservation.
- To learn about the educational practices followed at Cuckoo Kattupalli.
- To understand the importance of living in harmony with nature.
- To develop environmental awareness and a sense of responsibility among the students.

Methodology

- The students visited Cuckoo Kattupalli, Singarapettai, as part of their fieldwork.
- They observed the natural environment and learned about the educational methods followed there.
- The students interacted with the people involved in the activities and gained practical knowledge about nature-based learning.
- They learned how education can be connected with nature and everyday life.
- As part of the environmental conservation activity, the students planted 500 palm saplings in the area.
- They observed the importance of trees, plants, and natural resources and understood the need to protect them.
- The students recorded their observations and reflected on their experiences during the field visit.

SDG

- SDG 4 – Quality Education: The fieldwork provided students with experiential, practical, and nature-based learning opportunities.
- SDG 13 – Climate Action: The tree-planting activity contributed to environmental awareness and encouraged students to take action to protect the environment.
- SDG 15 – Life on Land: Planting 500 palm saplings promoted the conservation of terrestrial ecosystems, biodiversity, and natural resources.
- SDG 12 – Responsible Consumption and Production: The activity helped students understand the importance of protecting and responsibly using natural resources.

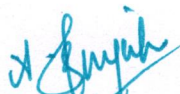

Output

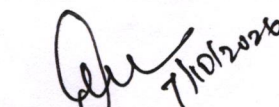

- The students successfully planted 500 palm saplings as part of the environmental conservation activity.
- They gained practical knowledge about tree planting and environmental protection.
- They learned about nature-based educational practices at Cuckoo Kattupalli.
- The field visit provided the students with valuable hands-on learning experiences.
- The students documented their observations, activities, and experiences during the fieldwork.

Outcomes

- They gained awareness of the need to live in harmony with nature.
- They understood how education can take place through direct interaction with the natural environment.
- Planting 500 palm saplings helped the students develop a sense of environmental responsibility and social commitment.
- The fieldwork enhanced their observation, teamwork, communication, and practical learning skills.
- Finally, 19 Students and 4 assistant Professors Participated and benefited from this field Work.
